Education

June 2014 **Bachelor of Science in Computer Science and Engineering and in Brain and Cognitive Sciences**, *Massachusetts Institute of Technology*, Cambridge, MA.

Work Experience

Sep 2014 – present **Research Assistant**, *Language and Cognition Lab, Stanford University*, Stanford, CA.
Developed tools for language acquisition research and conducted large-scale data analyses.

- Wordbank | `wordbank.stanford.edu`
  An online repository of language development data (uses Django, MySQL and R Shiny).
- wordbankr | `cran.r-project.org/web/packages/wordbankr`
  An R package for accessing Wordbank data.
- MetaLab | `metalab.stanford.edu`
  Tools for power analysis and experimental planning in language acquisition (uses R Shiny).
- Wordful
  A mobile app for collecting of word learning data (uses JavaScript, AngularJS, Ionic).

Sep 2013 – Aug 2014 **Undergraduate Researcher**, *MIT*, Cambridge, MA.
Designed and implemented a model of early cross-situational word learning (using Python).

June 2013 – Aug 2013 **Research and Development Intern**, *Basis Technology*, Cambridge, MA.
Improved a statistical model for named-entity resolution and entity linking through error analysis and software development (using Java, Python).

June 2012 – Aug 2012 **Undergraduate Researcher**, *MIT Lincoln Laboratory*, Lexington, MA.
Developed a behavioral experiment for investigating the connection between language and motor control (using Python).

Other Experience

Projects

- Multi-lingual translation
  `mikabr.shinyapps.io/linger`
- Visualization of historical gender of names
  `mikabr.shinyapps.io/names`
- Multi-function nonparametric bootstrap
  `github.com/langcog/langcog`
- Chatbot puzzle
  `github.com/mikabr/chatbot_puzzle`
- SAT analogy problem solver
  `github.com/mikabr/sat-solver`

Coursework

- Practical Natural Language Processing
- Natural Language and the Computer Representation of Knowledge
- Artificial Intelligence
- Introduction to Inference
- Design and Analysis of Algorithms
- Computer Systems Engineering
- Elements of Software Construction
- Computation Structures
- Probability and Random Variables
- Linear Algebra

Skills

Programming: Proficient in R (tidyr, dplyr, ggplot2, shiny, knitr), Python (django, nltk, numpy), JavaScript (angular, ionic); familiar with SQL, Java, MATLAB, Scheme.

Tools: UNIX, Git, Subversion, EC2, Apache, HTML, CSS, LaTeX.

Languages: Native English and Russian, conversational Hebrew.
